

## NMC-TED400TR

Cable tester with LCD Display

Cable tester NIKOMAX NMC-TED400TR with LCD display is designed to work with a wide range of cables. These are UTP / STP cables twisted pair, terminated with RJ45 connectors, coaxial cables with BNC connectors, telephone cables RJ11 / RJ12, USB cables (type A - type B). The tester is able to diagnose such errors in the line as a violation of the wiring layout of conductors, breakage of conductors and short circuits, is able to measure the length of the cable line, as well as equipped with a trace function, with which you can find the desired cable in a bundle suitable for finding hidden wiring. Cable tester NIKOMAX with LCD display, UTP / STP, RJ11, RJ12, RJ45, BNC, USB, with length measurement function and cable routing. The tester kit consists of a main module, a remote unit and a cable probe detector for testing.

### Ordering Table

P/N	Description	Individual package		
		Dimensions, mm	Volume, m3	Weight, kg
NMC-TED400TR	UTP / STP (USB, TEL, COAX)			
	LAN tester with LCD display and cable routing function	135 x 265 x 80	0.0028	0.569

## Detailed characteristics

Characteristic	Value
Warranty	1 year
Protection level	The main and remote module is gray
Housing material	Plastic
Packaging	Cardboard box
Temperature range	Storage from - 10 C to + 60 C, operation from - 10 C to + 60 C
Adjust screen contrast	Yes
Connectors on the device	2 x RJ45 (main and scan), BNC, RJ11, USB type B
Line testing for breaks and short-circuits	Yes
Checking for correct wiring	Yes
Shielding integrity check	Yes
Battery	Battery type "Krona" (6LR61)
Type of cable	LAN UTP / STP, Tel. RJ11 / RJ12, Coax (BNC), UCB (type A-type B)
Cable trace	Yes
The choice of units of length	Yes, meters / feet / yards
Setting screen auto-off	Yes
Cable length measurement	Yes, up to 1000 meters
Calibration	Yes, storage up to 7 values
Setting the auto-off tester	Yes, 15 / 30 / 60 / 120 minutes
Intercom system	Yes
Maximum length of tested lines	1000 m
